

Dear Dr. Stokes,

Please begin efforts to completely replace lethal dose testing on animals with in vitro testing methods that do not use animals.

Not only is this better science, it is the ethical and moral high road. The animals used are defenseless sentient beings, and I don't believe people are entitled to use these beings as our disposable "tasters".

Thank you so much for your attention to and concern with this matters. Your efforts are greatly appreciated.

Sincerely,

Anne D. White, M.Ed.
